1. Claims 5-9 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 7. In addition, claims 2-4 recite limitations not supported by the disclosure directed to the elected species and thus are also withdrawn from further consideration.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hashiguchi et al '346.

4. Claim 1 is objected to because of the following informalities: on lines 19 and 22, "or said housing" should be deleted since there is no support in the specification. Appropriate correction is required.

5. The other references cited on Form 892 disclose similar flat cable connectors with pivoting pressure members.
